

In-person Consent Form *(to be completed when subject arrives at in-person session)*

Key Information: Please read the following text carefully before continuing.

This study forms part of research into user experience and perception of augmented reality. Specifically, it will ask you to evaluate the quality of 3D holograms. Acceptance and completion of this consent form is required to participate in the study.

This session will last approximately 30 minutes, with the main experiment lasting approximately 20 minutes. You will not need to move a lot during the study, but there is the potential for your eyes to feel fatigued. You may also feel some head/neck fatigue from the weight of the headset, and slight heat discomfort since some headset devices become warm with prolonged use. Your participation in this study is completely voluntary, and you may stop the experiment at any time.

For questions about the study, contact Dr. Maria Gorlatova at maria.gorlatova@duke.edu. For questions about your rights as a participant in this research study, contact the Duke University Campus IRB at 919-684-3030 or campusirb@duke.edu.

If you have the following conditions, please DO NOT participate in this study.

1. Photosensitive Epilepsy (i.e. flashing images could induce a seizure)
2. Hyperopia/long-sightedness, strabismus, or colorblindness

By signing below, you consent to participate in the study described above.
